Education

Georgia Institute of Technology — *Atlanta, GA*

Master of Science in Computer Science, Artificial Intelligence Specialization; GPA: 4.00 — *Jan 2026 - Present*

Relevant Courses: Artificial Intelligence, Natural Language, Computer Networks, Cognitive Science, AI Ethics Society

Carleton University — *Ottawa, ON*

Bachelor of Computer Science Honours — *Jun 2024*

Relevant Courses: Design and Analysis of Algorithms, Introduction to Reinforcement Learning, Real-Time Operating Systems

Experience

RBC — *Toronto, ON*

Lead Quality Engineer — *Feb 2026 - Present*

- Led **end-to-end release validation**, including **acceptance testing**, **rollback verification**, and **comprehensive regression coverage**
- Designed and implemented **automated test frameworks** for **large-scale data compliance pipelines**, validating **ETL/ELT transformations** across **distributed data systems** using **medallion architecture**
- Implemented **data quality checks** including **uniqueness**, **null handling**, and **validity** record checking logic
- Developed advanced **Trino SQL validation queries** to ensure **data integrity**, **deduplication**, and **cross-table consistency** across **multi-source ingestion workflows**

FDM Group — *Toronto, ON*

Software Engineer Consultant — *Sep 2025 - Present*

- Completed intensive training in **Agile development**, **OOP**, and **AI integration**, applying concepts through hands-on engineering projects
- Built applications using **Spring/Spring Boot**, implementing **TDD** with **JUnit** and **Mockito** to improve code reliability and maintainability
- Deployed **containerized applications** using **Kubernetes**, **Docker**, **GCP**, and **GKE**, gaining practical experience with **cloud-native architectures**

IBM — *Markham, ON*

Software Engineer — *May 2022 - Aug 2023*

- Deployed and **regression-tested CD**, **LTSR**, and **Future** release candidate builds using automated **Jenkins CI/CD pipelines** across **AWS**, **Azure**, and **private cloud Fyre clusters**
- Deployed, upgraded, and manually intervened **Kubernetes clusters** deployed on **OpenShift Container Platform** to debug IBM Cloud Platform Common Services
- Created and enhanced **Jenkins pipelines**, **Makefiles**, and **Bash scripts** to automate build, deployment, and validation workflows
- Maintained a **Django-based** managerial dashboard tracking **10,000+** GitHub issues, synchronized via scheduled **cron jobs**
- Upgraded and optimized a **React-based** automation results dashboard to improve performance and usability
- Integrated an **automated AWS** resource cleanup script leveraging a **containerized Docker environment**

IBM — *New York, NY*

Site Reliability Engineer — *Jul 2023 - Aug 2023*

- **Automated deployment** and **provisioning** of **Prometheus** for monitoring and alerting on OpenShift 4.12 clusters
- Defined and upgraded Kubernetes clusters using **Helm** and **Helmfile**, improving reliability and consistency
- Created and rendered **.gotmpl** templates for **Prometheus**, **Alertmanager**, and **Thanos** to support scalable observability

IBM — *Austin, TX*

Lead Full Stack Engineer — *Jul 2022 - Sep 2022*

- **Led development** of a **Dynamic Plugins pilot project** deployed on **OpenShift 4.11** using **Kubernetes**
- Built UI mockups from **Figma** and **InVision** designs and implemented the frontend using **TypeScript** and **PatternFly**
- Deployed applications locally using **OKD** and remotely using **Fyre clusters**
- Built and pushed application images to **Quay.io** image registry using **Docker**

Skills

Languages **Python**, **C**, **C++**, **Java**, Shell, Makefile, JavaScript, TypeScript, ReactJS

Technologies **Linux/RHEL/CentOS**, **Git**, **OpenShift**, **Kubernetes**, **Private Cloud**, **Trino**, GCP, Transformers, PEFT, QNX, Docker/Podman
